LOOK FOR THE BALL BEARING ADVANTAGE!

Parts marked with this special badge indicate that they have been upgraded to use Ball Bearings.

The Ball Bearing Advantage

- ➔ Bearings save power, lubrication, and labor. With the rolling motion, bearings reduce the friction over a surface. This allows for sliding to occur instead of a pushing or a pulling motion. This process exerts less energy, and saves power.
- ➔ Our bearings don't require maintenance. Bearing maintenance can compromise the bearing causing leaks, or introducing grime into smooth operation.

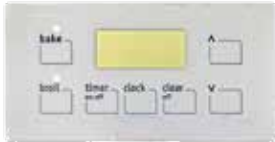

BALL BEARINGS USUALLY COST SLIGHTLY MORE THAN THEIR SLEEVE BEARING ALTERNATIVE.

This cost difference is more than made up, however, in the quality, reliability, and endurance of a Ball Bearing vs a sleeve bearing -
